DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the invention of group II, claim 7 in Paper No. 5 is acknowledged.

The new claims 54-106 are further restricted in light of the added claims.

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Claims 7, 54-60 described in a method of fabricating a semiconductor die, which minimize defects from CMP.

B. Claims 61-70, 71-76 and 87-96 described in a method of forming a test pattern on a semiconductor die, which comprising forming a plurality of substantially parallel metal lines (without CMP).

C. Claims 77-85 described in a method of fabricating a test structure for detecting defects in a semiconductor die caused by CMP.

D. Claim 86 described in a method of fabricating of metal test structures on a semiconductor die, which comprising forming a first and second section of plurality of test structures (without CMP).

E. Claims 97-106 described in a method of fabricating a semiconductor device.

Art Unit: 2811

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang D Vu whose telephone number is 703-305-3826. The examiner can normally be reached on Monday-Friday.
